CREMATION AND DISPOSITION AUTHORIZATION

Requirements for Cremation

Cremation will take place **ONLY** after all the following conditions have been met: (1) All necessary authorizations required by the family have been obtained, notarized, and no objections have been made. (2) All civil and medical authorities have issued all required permits and authorization.

This Authorization Form must be completed and signed prior to the cremation. Please read it carefully and ask us any questions you may have. Cremation is an irreversible and final process.

THE CREMATION PROCESS

Cremation is performed to prepare the remains of the Decedent for final disposition. It is carried out by placing the Decedent's remains in the casket or alternative container, which is then placed into a cremation chamber or retort where they are subjected to intense heat and flame. All cremations are performed individually. Upon completion of the Calcine Cycle all substances are consumed or driven off, except bone fragments (calcium compounds) and metal (including dental gold and silver and other non-human materials). Due to the nature of the cremation process, any personal possessions or valuable materials, such as dental gold or jewelry (as well as any body prostheses or dental bridgework) that are left with the remains and not removed from the casket or container prior to cremation may be destroyed or if not destroyed, will be disposed of by the Crematory. The Authorizing Agent understands that arrangements must be made with the Funeral Home to remove any such possessions or valuables prior to the time that the remains of the Decedent are transported to the Crematory. Following a cooling period, the cremated remains are then swept or raked from the cremation chamber. The cremated remains will be separated from most metal (including dental gold and silver) and other nonhuman material, to which may be affixed bone particles or other human residue. These materials will be disposed of in a non-recoverable manner unless otherwise specified. Although the Crematory will take reasonable efforts to remove all of the cremated remains from the cremation chamber, it is impossible to remove all of them, as some dust and other residue from the process will be left behind. In addition, while every effort will be made to avoid commingling, inadvertent and incidental commingling of minute particles of cremated remains from the residues of previous cremations is a possibility, and the Authorizing Agent understands and accepts this fact. The cremated remains are then mechanically processed (Pulverized).

It is important that you understand the cremation process that is described in this Authorization Form prior to signing it. We want you to fully understand the information provided in this Authorization Form, so we will be pleased to answer any questions about the cremation process or the other information in this Form.

_____ (Initial) I have read the above description of the cremation process and have no further questions about my decision to proceed.

2. PACEMAKERS, IMPLANTS, AND PROSTHESES

Pacemakers, radioactive, or other implants, mechanical devices or prostheses may create a hazardous condition when placed in the cremation chamber and subjected to heat. As Authorizing Agent, I have listed below any (including mechanical, prosthetic, implants, or materials), which may have been implanted in or attached to the Decedent.

Please **initial one** of the following statements:

_____ (Initials) **NO** - The remains of the Decedent do not contain any Devices

_____ (Initials) **YES** - The remains of the Decedent contain a pacemaker. As Authorizing Agent, I instruct the Funeral Home to remove any pacemaker or any other explodable implant. The Funeral Home is to dispose of all such Devices.

3. CASKET OR ALTERNATIVE CONTAINER

The Porter Crematory **DOES NOT** accept Metal or Fiberglass caskets for cremation. An alternative container is described as a container that is capable of being completely closed, is resistant to leakage or spillage, is sufficiently rigid to be handled easily, and provides protection for the health and safety of Crematory and Funeral Home personnel. I further understand that the casket or alternative container will be consumed as part of the cremation process.

4. URN OR TEMPORARY CONTAINER

After the cremated remains have been processed, they will be placed in the urn listed _____ or, if an urn is not provided to the Crematory, in a temporary container provided by the Crematory. In the event the urn or temporary container is insufficient to accommodate all of the cremated remains, the excess will be placed by the Crematory in a secondary container. This secondary container will be kept with the urn or the temporary container and handled according to the final disposition.
